EDUCATION

Dr. D.Y. Patil College of Engineering, Akurdi
Bachelor of Computer Engineering (Honors in Data Science)
Affiliated with Savitribai Phule Pune University

Pune, MH
Expected May 2027
CGPA: 8.89

EXPERIENCE

Early-Stage Startup
Software Developer (Part-Time)

Pune, MH
Jan 2025 – Apr 2026

- Led end-to-end development of a production website and backend systems, from architecture through deployment.
- Built and deployed a customer-facing platform used by real users; generated approximately INR 15+ Lakh in sales.
- Designed scalable application architecture and currently developing an AI-integrated workflow automation system.

Pragmatyc (Remote)
React Native Training & Internship Program

Ashburn, Virginia
Jan 2026 – Mar 2026

- Completed a structured training and internship program covering React Native, REST APIs, JWT authentication, and secure token storage.
- Developed mobile mini-projects using reusable components, API integration, and authenticated application flows.

PROJECTS

BookMyShow – Movie Ticket Booking Platform
React, Node.js, Docker, AWS

July 2025

- Developed a MERN movie ticket booking platform with Clerk authentication, Stripe payments, TMDB movie data, and role-based admin routes.
- Built admin workflows to create and manage movie shows, while separating customer and administrative access paths.
- Containerized client and server applications with Docker and automated image builds and DockerHub publishing through GitLab CI/CD.

VibeCode Editor – AI-Powered Web IDE
Next.js 15, TypeScript, Monaco, Ollama

December 2025

- Created a browser-based IDE for real-time code editing and execution with private, local LLM assistance through Ollama.
- Integrated Monaco Editor and context-aware AI features for code review, debugging, optimization, and inline autocompletion.
- Implemented OAuth authentication, project templates, and full-stack execution with NextAuth, MongoDB, Prisma, and WebContainers.

AI-Based Knowledge Representation and Repository for Enterprise Knowledge Retention
FastAPI, Next.js, LangGraph, Neo4j, ChromaDB

June 2026
[↗ Live](#)

- Built and deployed an enterprise knowledge-retention platform that ingests PDFs, Excel files, images, audio/video, and Slack messages into a searchable organizational memory.
- Developed a FastAPI ingestion pipeline using PyMuPDF, OpenPyXL, OCR, audio transcription, LangChain, and Groq LLM structured extraction to capture decisions, rationale, people, alternatives, topics, and impact.
- Implemented LangGraph ReAct agents for source-aware knowledge retrieval and impact analysis, combining Neo4j decision graphs with ChromaDB vector search for grounded answers and source traceability.
- Added Supabase JWT authentication, project-level data isolation, role-based permissions, activity tracking, and an interactive graph visualization with Next.js and TypeScript.

TECHNICAL SKILLS

Programming Languages: Java, C++, JavaScript, TypeScript, Python, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend & AI: Node.js, Express.js, FastAPI, REST APIs, LangChain, LangGraph, Groq, Ollama

Data & Cloud: MongoDB, MySQL, Neo4j, ChromaDB, Supabase, AWS, Docker

Foundations & Tools: Data Structures and Algorithms, OOP, DBMS, OS, Computer Networks, Git, GitHub, GitLab
